Figure 1 consists of 12 bar charts, labeled (a) through (l), arranged vertically. Each chart displays the percentage of total protein (Y-axis, 0 to 100) for various protein types (X-axis) across different conditions (1 to 12). The protein types are labeled as A, B, C, D, E, F, G, H, I, J, K, and L. The conditions are labeled as 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12. The charts show varying distributions of protein types across fractions under different conditions.
